

Spark Change In Utah 2024

We're HEAL Utah

We work to protect Utah's
environment and its people.

We protect Utah's **environment** and **its people**

HEAL's mission is to protect Utah's environment and its people by promoting clean air, clean energy, and comprehensive solutions to radioactive and toxic waste.

Air Quality

ENERGY

WASTE

PROTECTING COMMUNITIES FROM AIR POLLUTION

We believe that action on
air pollution is action on climate change.

That advocating for clean air is one of the most immediate ways we can protect communities and the environment. That's why HEAL Utah works to strengthen and defend regulations and air quality standards while supporting policies and strategies that prioritize public health and frontline communities.

Advance Sustainable
and Equitable
Transportation

Ensure Compliance with
and Advocate for
Updated Air Quality
Regulation

Ensuring Strong and
Accountable Mining
Regulations

BUILDING AN INCLUSIVE CLEAN ENERGY FUTURE

We believe that our energy system should be built for the people it serves.

That's why HEAL Utah works to advance a clean energy future that not only reduces emissions and stabilizes the climate, but also promotes adaptation, resilience, health equity, and economic opportunity in our communities.

Advance Renewable
Energy

Support Utah's Energy
Communities

Advance Energy
Efficiency and
Electrification

PROTECTING COMMUNITIES FROM RADIOACTIVE AND TOXIC EXPOSURES

We recognize that radioactive and toxic materials pose an environmental and public health crisis in tandem with our climate crisis.

Consequently, HEAL Utah believes there is no inclusive clean energy future if we continue to ignore the impacts of extraction on public health and frontline communities. When it comes to past, present, and future harms, we must stand with and protect Utah's communities.

CITY BEAT

Tooele's Risky Business

BY BEN FULTON

Two and a-half years after it started burning a vast percentage of the Army's chemical weapons, the Tooele Chemical Weapons Incinerator operates under a dark cloud.

Critics ranging from the Sierra Club to the Vietnam Veterans of America love rolling out these facts and figures, scary though they are: First, the incinerator has logged 40 incidents involving spills and shutdowns; second, the incinerator has gone through several general managers; third, and most disturbing, incinerator management allegedly fired the safety manager after he raised one question too many about the safety of plant operations.

"If you look at all the problems and violations that have occurred out there, you're left with the conclusion that we need more proof than just their word," says Jason Groenewold, director of Families Against Incinerator Risk (FAIR), a citizens' group keeping close watch over the incinerator.

Health Risk Assessment report, that matter most. What does the report include, and what does it leave out?

PHOTO: FRED HAYES

FAIR's Jason Groenewold: "We need more proof than just their word."

For the folks at FAIR, your health could depend on that very question. Published by the Utah Department of

Assessment. The department is a lot more reserved about any changes in the Health Risk Assessment, however. For them it's

Assessment for the Tooele Chemical Weapons Incinerator attempts to gauge any long-term health effects that might result from exposure to nerve agents currently burned at the plant. The DEQ also issues the incinerator's operating permit to EG&G Defense Materials, Inc., a company contracted by the U.S. Army to manage the place. Thereafter, the department checks to ensure the incinerator operates within the permit.

FAIR has always been critical of the DEQ's Health Risk Assessment of the incinerator, which operates 10 miles west of Tooele. Groenewold says it doesn't measure the non-cancerous effects of chemicals burned, makes faulty assumptions about the living habits of the nearby Tooele community and, most disturbing of all, uses data from antiquated studies that might not stand up to current scientific standards.

So Groenewold was pleased when, last month, the DEQ announced during a meeting with concerned citizens that it would revise the assessment. The department is a lot more reserved about any changes in the Health Risk Assessment, however. For them it's
